C. **Antennas:**

1. **Placement of Satellite Dishes.** This rule applies to the placement on a manufactured home or leased homesite of a dish designed to receive broadcast satellite service or other video programming services (referred to as a "satellite dish"). Regulations of the Federal Communications Commission (the "FCC") do not allow management to prohibit installation of satellite dishes of one meter diameter (39 inches) or smaller on homes, but they do allow reasonable restrictions affecting placement, appearance or installation. A satellite dish installed by a resident of the Community must be affixed to the resident's home or improvements or the ground within the resident's homesite in a location not visible from the street. If placement in such a location impairs the quality of reception, a partially visible satellite dish colored to blend with its surroundings may be placed on the home or homesite in the most unobtrusive location possible, attractively shielded from view to the extent feasible. In all instances, the satellite dish must be securely affixed and placed in a

manner that will not constitute a hazard. Satellite dishes larger than one meter in diameter are prohibited. Plans for installation must first be approved in writing by Community management.

2. **Placement of Television Antennas.** This rule applies to the placement on a manufactured home or leased homesite of an antenna designed to receive over the air broadcast signals from local VHF and UHF television stations. Regulations of the Federal Communications Commission (the "FCC") do not allow management to prohibit installation of such antennas on homes, but they do allow reasonable restrictions affecting placement, appearance or installation. In order to maintain an attractive community, residents are strongly urged to rely on indoor antennas, cable or master antenna distribution rather than install visible outdoor antennas. Efforts have been initiated to urge change or reinterpretation of FCC regulations so that outdoor antennas may be prohibited. Residents are advised before spending money on an antenna that such an antenna may later be prohibited. If a resident nevertheless decides to install an outdoor antenna, it must be affixed to the resident's home or improvements or the ground within the resident's homesite in a location not visible from the street. The antenna must be no higher than 12 feet above the roof line or larger than needed to receive a signal of reasonable quality. If such placement impairs the quality of reception, a partially visible antenna may be placed on the home or homesite in the most unobtrusive location possible, attractively shielded from view to the extent feasible. In all instances, the antenna should be securely affixed and placed in a manner that will not constitute a hazard. Plans for installation must first be approved in writing by Community management.

3. **HAM ANTENNA:** A HAM radio antenna may not be higher than 12 feet above the roofline. HAM radio antennas that are in the Community as of the initial effective date of these Rules and Regulations may stay in the Community. A HAM antenna must be removed when the Resident operator moves from the Community or is no longer in use.

Outside lighting is recommended by Management, within these guidelines.

F. Passive Solar Panels: Prior to installation of passive solar panels Homeowner must obtain Community Management's written approval in regards to the amount and location of the panels.

8. **SPACE/LOT STANDARDS:** Homeowner shall maintain the homesite in good condition and repair and in a neat, clean, safe, attractive and well-kept fashion. Landscaping must be regularly maintained and space must be free of debris.

Patio furniture and barbecue equipment on the patio and storage cabinets that are neat and clean and approved in writing by Community management are the only freestanding items permitted outside of the mobilehome.

Prior to commencing any landscaping work, including additions, deletions or changes to existing landscaping, Homeowner shall submit a detailed landscape plan to Community for written approval.

All concrete, asphalt and other surfaces such as patios and hardscape shall be kept clean, neat and maintained free of oil and all other sticky, soapy or oily substances, and maintained in good repair and condition.

To avoid damage to underground utilities, Homeowner must obtain the written consent of the Community prior to digging or driving stakes or rods into the ground. Homeowner is responsible for any damage caused as a result of digging upon the space.

Towels, rugs, clothing, or laundry of any kind may not be hung outdoors in view from the street on the lot at any time.

A. Landscaping: Each Homeowner shall landscape his/her lot in a clean, attractive and well-kept fashion. No landscape plans shall be undertaken without Community Management's prior written approval. Landscape of homesites or changes to existing landscape shall be completed within sixty (60) days of the date the rental agreement is signed or issued or the date work is first commenced.

Because of the infinite variety of living and non-living objects which may be used in landscaping, it is impossible to describe all things which the Community will or will not accept as landscaping. Consequently, the following general landscape standards are provided only to assist Homeowner in this preliminary planning. The Community's general landscape standards are:

1. The Community encourages Homeowners to use discretion as far as lawn, flowers and shrubs are concerned;
2. If rock is incorporated in the landscape plan, plastic ground cover must be placed under the rock to prevent weeds from growing up through the rocks;
3. The Community must approve the type and placement of trees planted. Trees must be planted in Community approved planters or in such a manner as to not interfere with plumbing or other utilities;
4. A limited number of statues, plastic fountains, birdbaths, yard art and fences are permitted with Community approval.
5. All plans for landscaping and hardscaping must be approved in writing by management.

B. Removal of Landscaping: When vacating lot, you may with the Community's prior consent and at your own expense, remove all such landscaping planted by you, provided you repair all damage to property caused by removal and leave the lot in similar condition and grade prior to landscaping. If landscaping is not removed, all plantings and/or other improvements put into or attached to the ground become part of the space and will be the property of the next resident of the space and may not be removed without Community permission.

C. Landscape/Tree maintenance: All landscape shall be maintained by the Homeowner in a neat, orderly, clean and weed-free condition, including keeping any trees on the Homeowner's Homesite neatly trimmed on a daily basis. Arrangements must be made by tenants to ensure space properly maintained during tenants absence. Trees, including those located on Homeowner's Homesite, may not be removed by Homeowner without the Community's written consent unless the removal is requested by the Community. No tree or shrubbery is allowed which does or may develop a root structure which causes cracking, buckling, or otherwise interferes with streets, driveways or other Community facilities.
